Lower Elementary Newsletter

May 2015

ANNOUNCEMENTS:

Teacher appreciation is on Friday May 15.

Month at a glance: May

Our Transition students have been spending their mornings with us recently. We've been enjoying learning together as a class.

In addition to our Math and Language Arts individual lessons in the mornings, our afternoons consist of a variety of activities. The month at a glance provides an overview of what we learn beyond just Math and Language Arts, but is occasionally subject to change.

Science and Culture:

As we approach the end of the year, we are starting our review of things we have learned so far. In addition, each child will be studying about a country of interest.

The youngers will be learning about the comb jelly and gymnosperms as we continue along their Geologic Time-Line.

The olders are reviewing their Civilization Time-Line.

For our space lessons, we will be learning about Saturn and Uranus as we continue our studies of the solar system.

Art:

We are finishing up our awesome hot-air balloon pictures! We are also going to be making our very own sock puppets in addition to a mosaic!

After school corner:

Science- We are learning the basic electronics with Snap Circuit, Jr. Build project that make sound effects, different types of alarms, touch circuits and games.

Music- We are practicing our musical presentation for June 26th.
